SUMMARY

- Driven and adaptable individual with a proven potential to grow both personally and professionally. Passionate about MERN stack development and dedicated to honing skills in order to contribute to impactful projects.

PROJECTS

Trident Metshaft

📅 Present

🌐 <https://metshaft.onrender.com/>

Developed Trident Metshaft, a book journey tracker website with progress tracking functionality.

- Designed and implemented an attractive and user-friendly admin dashboard for efficient management of book data.
- Integrated authentication and authorization features, including Google authentication, to ensure secure access for users.
- Implemented a notification system where administrators can send notifications to users individually or collectively.

Cheap Delala

Cheap Delala is a platform that connects house buyers and sellers, serving as a broker, with messaging functionality for seamless communication

- Facilitated connection between house buyers and sellers as a broker on the Cheap Delala platform.
- Developed an admin page for efficient management of website users by the administrators.
- Enabled secure and efficient communication between buyers and sellers through the messaging functionality.

Rabbit Delta

RDX (intern)

📅 2023 - 2023 📍 Addis Ababa, Ethiopia

As an intern at RDX, I contributed to the Rabbit Delta project by creating a user-friendly interface, designing pages, and implementing features to enhance the overall user experience.

- Collaborated with the Rabbit Delta team to design and develop a user-friendly interface for the project.
- Implemented additional features to enhance the user experience, focusing on usability and functionality
- Created visually appealing and intuitive page designs to improve the overall aesthetics and usability of the application.
